

of persistence of the active ingredient in the environment.

E. Cumulative Exposure

Consideration of a common mode of toxicity is not appropriate, given that there is no indication of mammalian toxicity of harpin protein and no information that indicates that toxic effects would be cumulative with any other compounds. Moreover, harpin does not exhibit a toxic mode of action in its target pests or diseases.

F. Safety Determination

1. *U.S. population.* Harpin's lack of toxicity has been demonstrated by the results of acute toxicity testing in mammals in which harpin caused no adverse effects when dosed orally and via inhalation at the limit dose for each study. Thus, the aggregate exposure to harpin over a lifetime should pose negligible risks to human health.

2. *Infants and children.* Based on the lack of toxicity and low exposure, there is a reasonable certainty that no harm to infants, children, or adults will result from aggregate exposure to harpin residues. Exempting harpin from the requirement of a tolerance should pose no significant risk to humans or the environment.

G. Effects on the Immune and Endocrine Systems

EDEN Bioscience Corporation has no information to suggest that harpin will adversely affect the immune or endocrine systems.

H. Existing Tolerances

There are no existing tolerances for harpin protein in the United States.

I. International Tolerances

EDEN Bioscience Corporation is not aware of any tolerances, exemptions from tolerance or MRL's issued for harpin protein outside of the United States.

SUPPLEMENTARY INFORMATION:

This gives notice that the revenue threshold used for classifying carriers for accounting purposes remains at \$112 million. Section 402(c) of the 1996 Act mandates that we "adjust the revenue requirements" of §§ 32.11, 64.903, and part 43 of our rules "to account for inflation as of the release date of the Commission's Report and Order in CC Docket No. 91-141, and annually thereafter." Prior to passage of the 1996 Act, our rules established a \$100 million threshold to classify carriers for accounting purposes in § 32.11, for filing cost allocation manuals in § 64.903, and for filing certain reports with the Commission in part 43.

The Commission uses the Gross Domestic Product Chain-type Price Index (GDP-CPI) to adjust the revenue threshold for inflation each year. We
